Appendix E	The Secretary of the Interior’s Standards for Rehabilitation from North Carolina State Historic Preservation Office

I. INTRODUCTION

The North Carolina General Statutes (N.C.G.S.) in Article 22, Urban Redevelopment Law, recognize that there are blighted areas which exist throughout North Carolina. Generally, these blighted areas exhibit some or all of the following conditions:

- economic or social liabilities, inimical and injurious to the public health, safety, morals and welfare of the residents of the State, harmful to the social and economic well-being of the entire communities in which they exist, depreciating values therein, reducing tax revenues, and thereby depreciating further the general community-wide values.
- areas which contribute substantially and increasingly to the spread of disease and crime, necessitating excessive and disproportionate expenditures of public funds for the preservation of the public health and safety for crime prevention, correction, prosecution, punishment and the treatment of juvenile delinquency and for the maintenance of adequate police, fire, and accident protection and other public services and facilities, constitute an economic and social liability, and substantially impair or arrest the sound growth of communities.
- conditions beyond remedy or control entirely by regulatory processes in the exercise of the police power and cannot be effectively dealt with by private enterprise under existing law without the additional aids herein granted.
- the acquisition, preparation, sale, sound re-planning, and redevelopment of such areas in accordance with sound and approved plans for their redevelopment will promote the public health, safety, convenience and welfare.

In order to promote the health, safety, and welfare of the inhabitants of communities and their blighted areas, the creation of bodies corporate and politic, to be known as redevelopment commissions, is authorized. Such commissions shall exist and operate for the public purposes of acquiring and re-planning such areas and of holding or disposing of them in such manner that they shall become available for economically and socially sound redevelopment. Such purposes are hereby declared to be public uses for which public money may be spent, and private property may be acquired by the exercise of the power of eminent domain.

On May 13, 2014, the Town of Edenton Town Council adopted a Resolution Creating the Town of Edenton Redevelopment Commission. The resolution is attached as Appendix A and designates the Town of Edenton Town Council to perform the powers, duties, and responsibilities of the Town of Edenton Redevelopment Commission.

Following its establishment, the Commission instructed the Town of Edenton staff, with the assistance of Holland Consulting Planners, Inc., to determine specifically which areas of the Town of Edenton would satisfy the following N.C.G.S. definition of a "blighted area":

"an area in which there is a predominance of buildings or improvements (or which is predominantly residential in character), and which, by reason of dilapidation, deterioration, age or obsolescence, inadequate provision for ventilation, light, air, sanitation, or open spaces, high density of population and overcrowding, unsanitary or unsafe conditions, or the existence of conditions which endanger life or property by fire and other causes, or any combination of such factors, substantially impairs the sound growth of the community, is conducive to ill health, transmission of disease, infant mortality, juvenile delinquency and crime, and is detrimental to the public health, safety, morals or welfare; provided, no area shall be considered a blighted area within the meaning of this Article, unless it is determined by the planning commission that at least two thirds of the number of buildings within the area are of the character described in this subdivision and substantially contribute to the conditions making such area a blighted area; provided that if the power of eminent domain shall be exercised under the provisions of this Article, it may only be exercised to take a blighted parcel as defined in subdivision (2a) of this section, and the property owner or owners or persons having an interest in property shall be entitled to be represented by counsel of their own selection and their reasonable counsel fees fixed by the court, taxed as a part of the costs and paid by the petitioners.

'Blighted parcel' shall mean a parcel on which there is a predominance of buildings or improvements (or which is predominantly residential in character), and which, by reason of dilapidation, deterioration, age or obsolescence, inadequate provision for ventilation, light, air, sanitation, or open spaces, high density of population and overcrowding, unsanitary or unsafe conditions, or the existence of conditions which endanger life or property by fire and other causes, or any combination of such factors, substantially impairs the sound growth of the community, is conducive to ill health, transmission of disease, infant mortality, juvenile delinquency and crime, and is detrimental to the public health, safety, morals or welfare; provided, no parcel shall be considered a blighted parcel nor subject to the power of eminent domain, within the meaning of this Article, unless it is determined by the planning commission that the parcel is blighted."

II. SELECTION OF REDEVELOPMENT AREAS

Based on field surveys conducted by the Town staff and consultant in June to August 2014, two areas of Edenton were determined to meet the N.C.G.S. definition of a blighted area. Those areas are generally indicated on Map 1 and are referred to as the Moseley Street Redevelopment Area and the North Oakum Street Redevelopment Area. Seventy-two percent (72%) of the structures in the North Oakum Street Redevelopment Area, and seventy-eight percent (78%) of the structures in the Moseley Street Redevelopment Area exhibit deteriorating conditions, both areas meeting the N.C.G.S. requirement for 2/3 of an area's buildings contributing to blighting influences. *Note: There are other areas of Edenton which exhibit some blighting influences; however, they do not meet the "blighted area" definition.*

This Redevelopment Plan addresses the Moseley Street Redevelopment Area. The North Oakum Street area is addressed in a separate redevelopment plan.

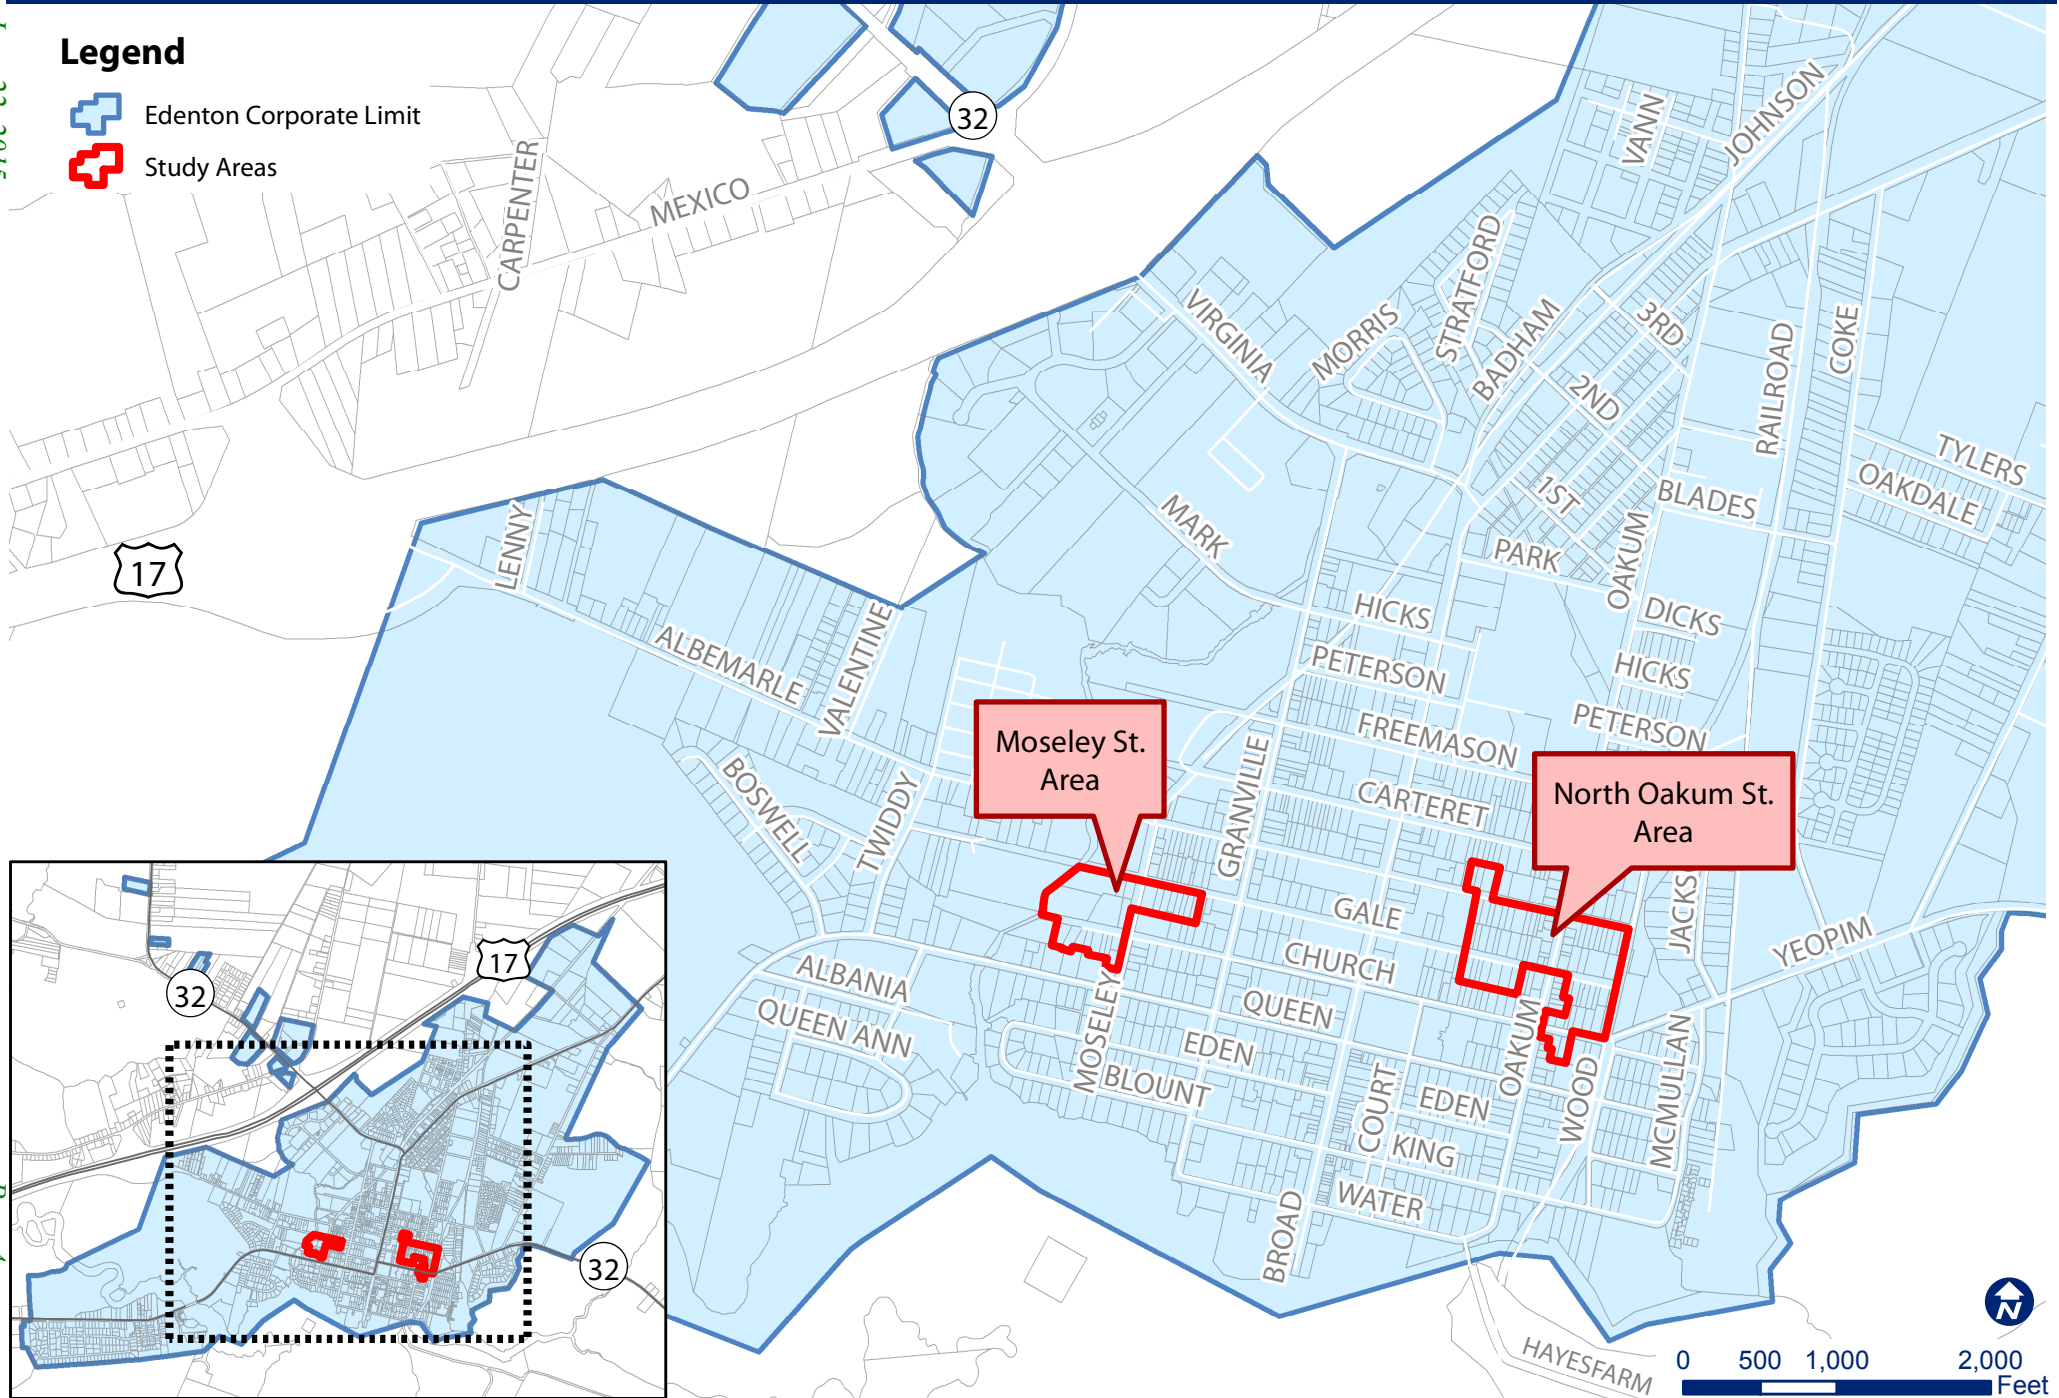

As directed for N.C.G.S. 160A-513, a redevelopment plan shall include without being limited to the following:

- (1) The boundaries of the area, with a map showing the existing uses of the real property therein;
- (2) A land use plan of the area showing proposed uses following redevelopment;
- (3) Standards of population densities, land coverage and building intensities in the proposed redevelopment;
- (4) A preliminary site plan of the area;
- (5) A statement of the proposed changes, if any, in zoning ordinances or maps;
- (6) A statement of any proposed changes in street layouts or street levels;
- (7) A statement of the estimated cost and method of financing redevelopment under the plan; provided that, where redevelopment activities are performed on the basis of annual increments, such statement to be sufficient shall set forth a schedule of the activities proposed to be undertaken during the incremental period, together with a statement of the estimated cost and method of financing such scheduled activities only;
- (8) A statement of such continuing controls as may be deemed necessary to effectuate the purposes of this Article;
- (9) A statement of a feasible method proposed for the relocation of the families displaced.

III. MOSELEY STREET REDEVELOPMENT AREA BOUNDARIES

Map 2 delineates the Moseley Street Redevelopment Area boundaries. The area includes approximately 8.09 acres, including 1.44 acres of public right-of-way. All properties are identified by both street address and tax parcel PIN number. The redevelopment area includes a total of 23 structures which front on Moseley, Gale, or Church Streets. The majority of the parcels front on West Gale and West Church Streets, with the southernmost portion of the area fronting on South Moseley Street.

IV. EXISTING CONDITIONS

A. Structure Conditions and Property Values

Map 2 also delineates the conditions of all structures within the Moseley Street Redevelopment Area, including structures which were vacant in October 2014. Eighty-one percent (81%), well over the two-thirds N.C.G.S. "blighted area" definition requirement, of the structures in the Moseley Street Redevelopment Area exhibit deteriorated conditions. Vacancies were determined based upon utility records and field surveys. The condition classifications are based on field survey/analysis conducted by the Town of Edenton staff and Holland Consulting Planners, Inc., during the months of June, July, and August 2014.

All structures were classified based on the following standards:

- **Moderately Deteriorated** - Repair cost <40% of replacement value
- **Severely Deteriorated** - Repair cost >40% of replacement value
- **Dilapidated** - Repair cost >80% of replacement value.

The following provides visual indicators of building condition terms:

Dilapidated: A structure is generally considered dilapidated if four (4) or more of the following *dilapidated* exterior conditions are visible.

Severely Deteriorated: A structure is severely deteriorated if three (3) or more of the following *severely deteriorated* exterior conditions are visible.

Moderately Deteriorated: A structure is moderately deteriorated if three (3) or more of the following *moderately deteriorated* exterior conditions are visible.

These general conditions must be considered in concert with the anticipated cost of repairs.

	<u>Dilapidated</u>	<u>Severely Deteriorated</u>	<u>Moderately Deteriorated</u>
1. Windows/Doors	Severely damaged or decayed casing or sashes or doors, non-repairable fit to casing	Cracked or broken panes, inadequate caulking, no storm windows/doors, peeling or chipped paint	Poor but repairable fit
2. Foundation	Appears to be incapable of supporting normal load, severe leaning	Inadequate or no foundation vents, missing or repairable foundation wall	Foundation wall requires painting or stuccoing or minor repair
3. Roof	Major sagging or structurally unsound, large cracks or holes, roof supports incapable of supporting normal roofing load	Rusted tin, loose or curled shingles, leaking, minor sagging	N/A
4. Exterior Walls	Severe leaning or buckling, large holes or cracks, major deterioration to wood siding, not weathertight	Patches of loose or missing siding	Chipped or peeling paint, minor deterioration of wood siding
5. Chimneys	Severely leaning, missing bricks or essential parts, holes in exhaust system	In need of minor repair	N/A
6. Stairs/Porches/Stoops	Unstable, incapable of supporting normal load, major deterioration of wood members, severe cracking or separation of concrete	Loose or non-secure steps, lack of handrails for exterior stairs with four or more risers, missing or non-secure wood members, abnormally uneven or worn surface	Peeling or chipped paint
7. Grounds	N/A	Heavy undergrowth or noxious weeds	Poor drainage, excessive debris

NOTES: (1) For dilapidated structures, the cost of repairs should exceed 80% of the replacement value of the unit; (2) Unobserved interior conditions may result in a building being in worse condition than indicated by exterior observations.

*Condition abbreviations: D=Dilapidated; SEV=Severely Deteriorated; MOD=Moderately Deteriorated; STD=Standard; VAC=Vacant.

** Severely deteriorated structure value estimated at \$25,000 (structure only).

*** Severely deteriorated structures values estimated at \$11,000 each; moderately deteriorated structure value estimated at \$13,933.

Note: If building value is listed at \$1,000 or less, condition was considered vacant.

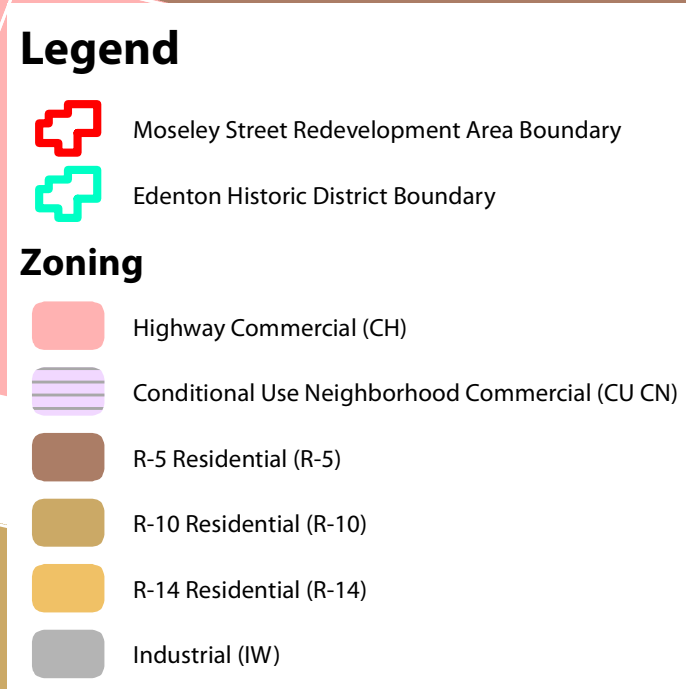

B. Zoning

The Moseley Street Redevelopment Area is zoned entirely R-5 Residential. The zoning is depicted on Map 3. The minimum lot size for the R-5 Residential zoning district is 5,000 square feet and the minimum lot width for a single-family dwelling is fifty (50) feet (plus 30 feet for second unit and 10 feet for each additional unit). Map 4 delineates the parcels which are non-conforming (insufficient lot width or size). The non-conforming parcels include twelve (12) with insufficient width. To accomplish redevelopment and maintain neighborhood character/appearance, revisions to the Town's Land Development Code should be made to accommodate development/redevelopment of the non-conforming parcels.

The northwest corner of the Gale Street/Moseley Street intersection includes a town-owned open space/park area zoned Industrial. The Town should consider rezoning the area to an R-5 Residential district. The park was acquired with North Carolina Clean Water Trust Funds and must remain as open space.

In order to understand current zoning requirements, the entire Town of Edenton Unified Development Ordinance must be reviewed to determine its impact on the Moseley Street Redevelopment Area. However, Appendix C provides the October 2014 Table of Permitted Uses, which identifies the uses allowed in the R-5 zoning district. Currently, there do not appear to be any significant non-conforming uses located within the Moseley Street Redevelopment Area.

- Non-Residential Conditions

 Dilapidated

C. Vacant Structures

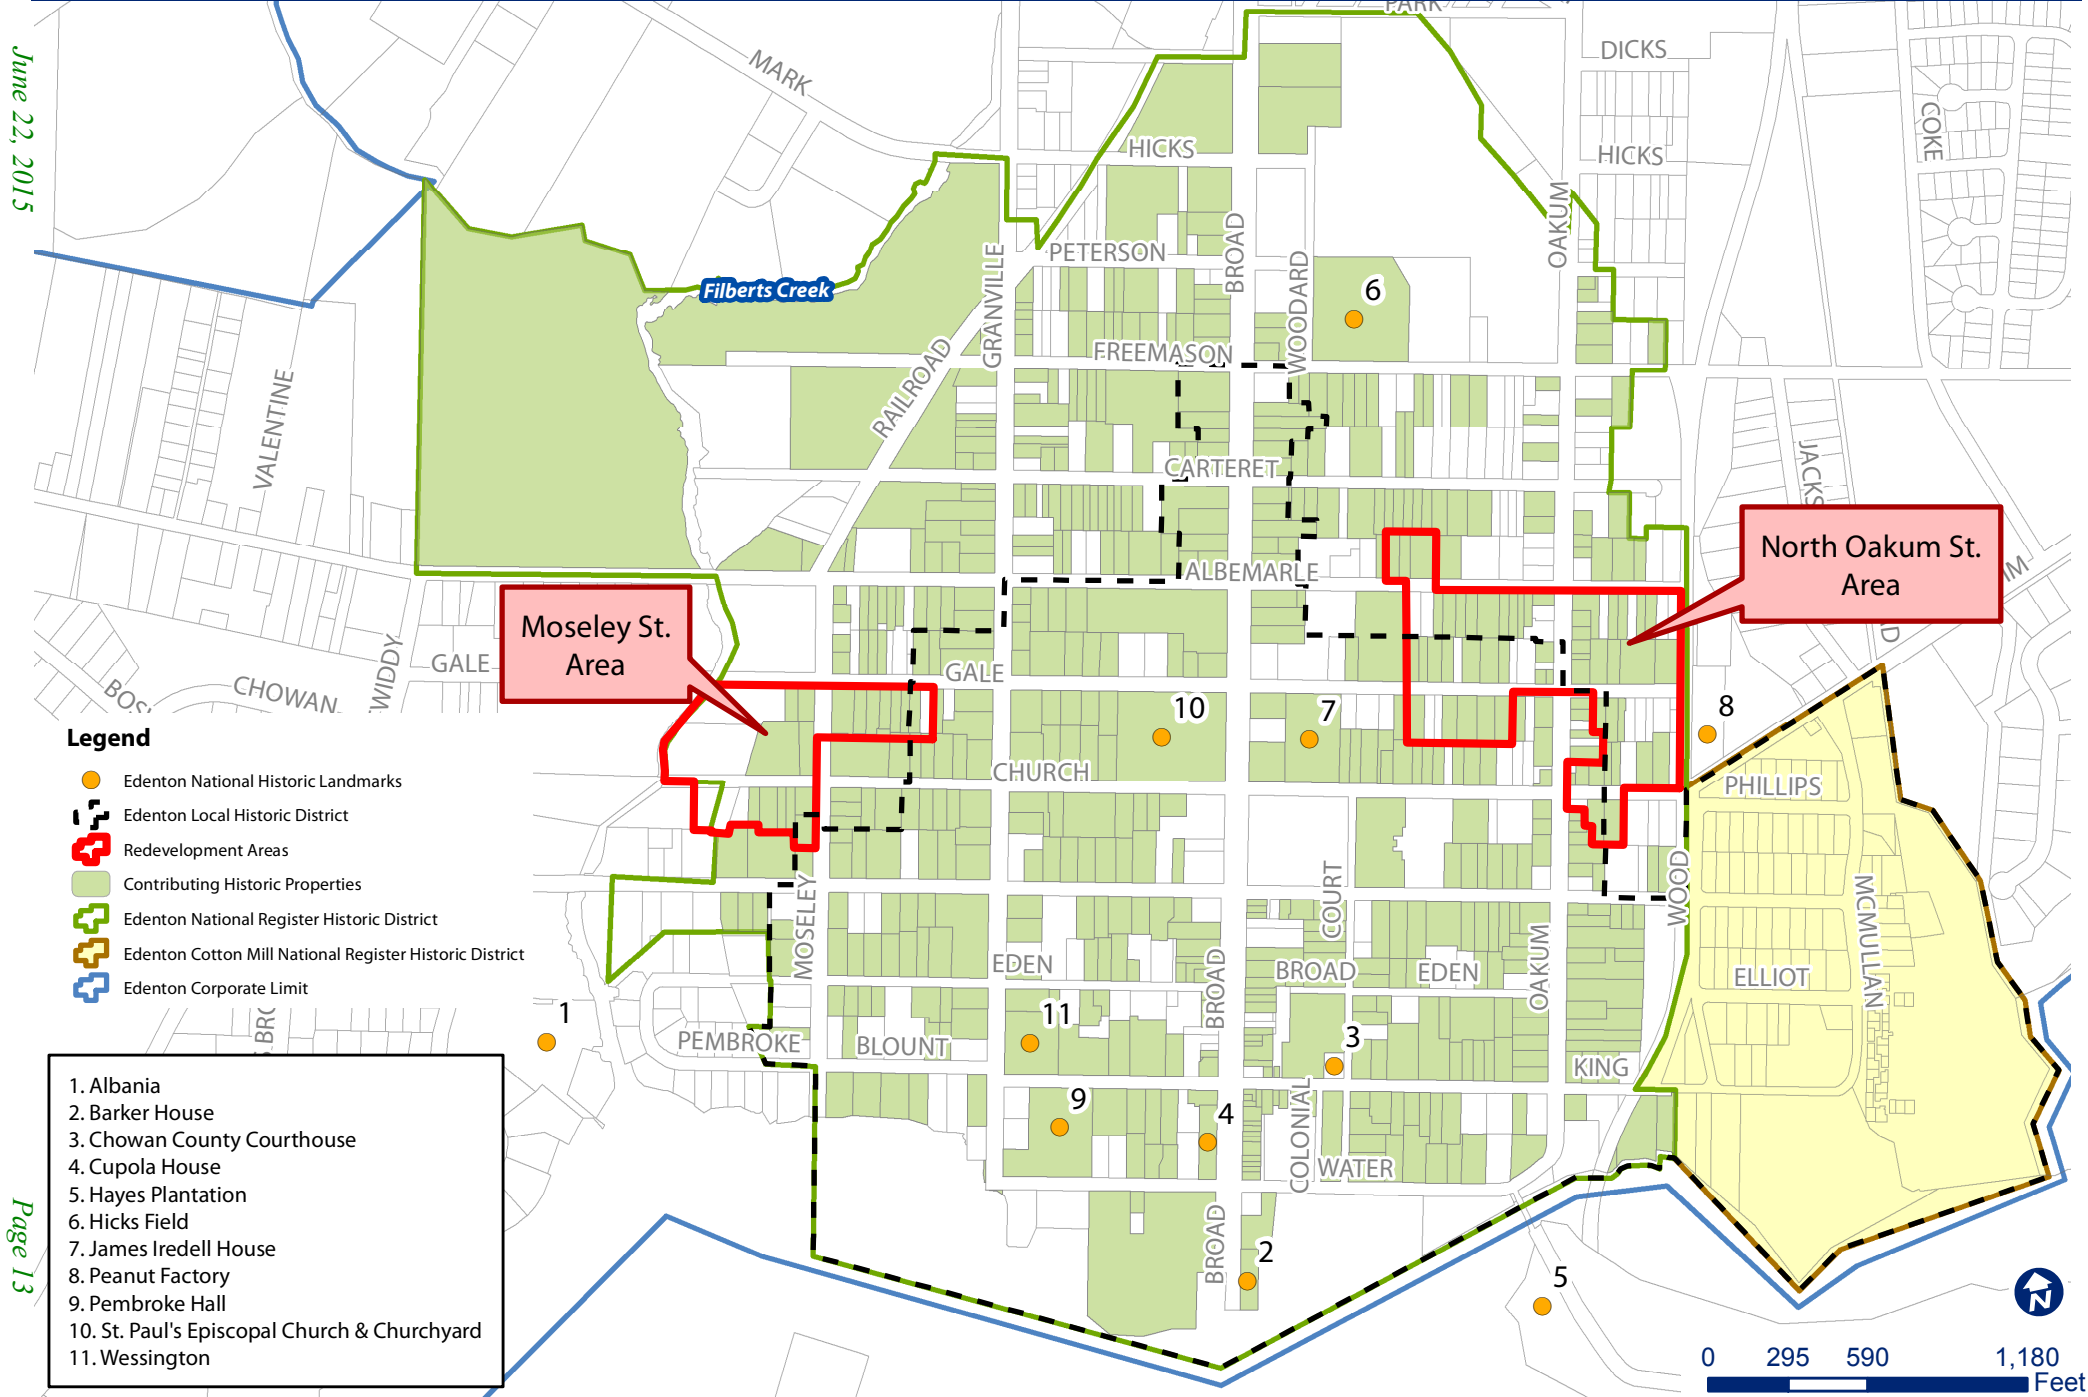

Of the 23 residential structures located in the redevelopment area, 7 structures, or 30%, of the area's total residential dwelling unit inventory are vacant. By comparison, 10.7% of Edenton's total housing inventory was vacant in 2010, and 14.3% of the state's total inventory was vacant. The vacancy rate for the Moseley Street Redevelopment Area is significantly higher than the town's and state's vacancy rates. High residential vacancy rates are indicative of blighting conditions including: juvenile delinquency and crime, public safety concerns, and, in general, concerns with public welfare.

D. Historic District

Approximately 7% of the Moseley Street Redevelopment Area is located in the Town of Edenton Local Historic District. In addition, all of the redevelopment area is located in the Town of Edenton National Register Historic District. The district boundaries are delineated on Map 5. The Town of Edenton Historic District guidelines can be found at the Town's planning department office.

Map 5: Town of Edenton Local and National Historic Districts

June 22, 2015

E. Infrastructure Conditions

With one small exception, there are no significant public works deficiencies/needs within the Moseley Street Redevelopment Area. There is no curb and gutter on West Church Street, west of Moseley Street. This circumstance, however, does not necessarily constitute a drainage problem.

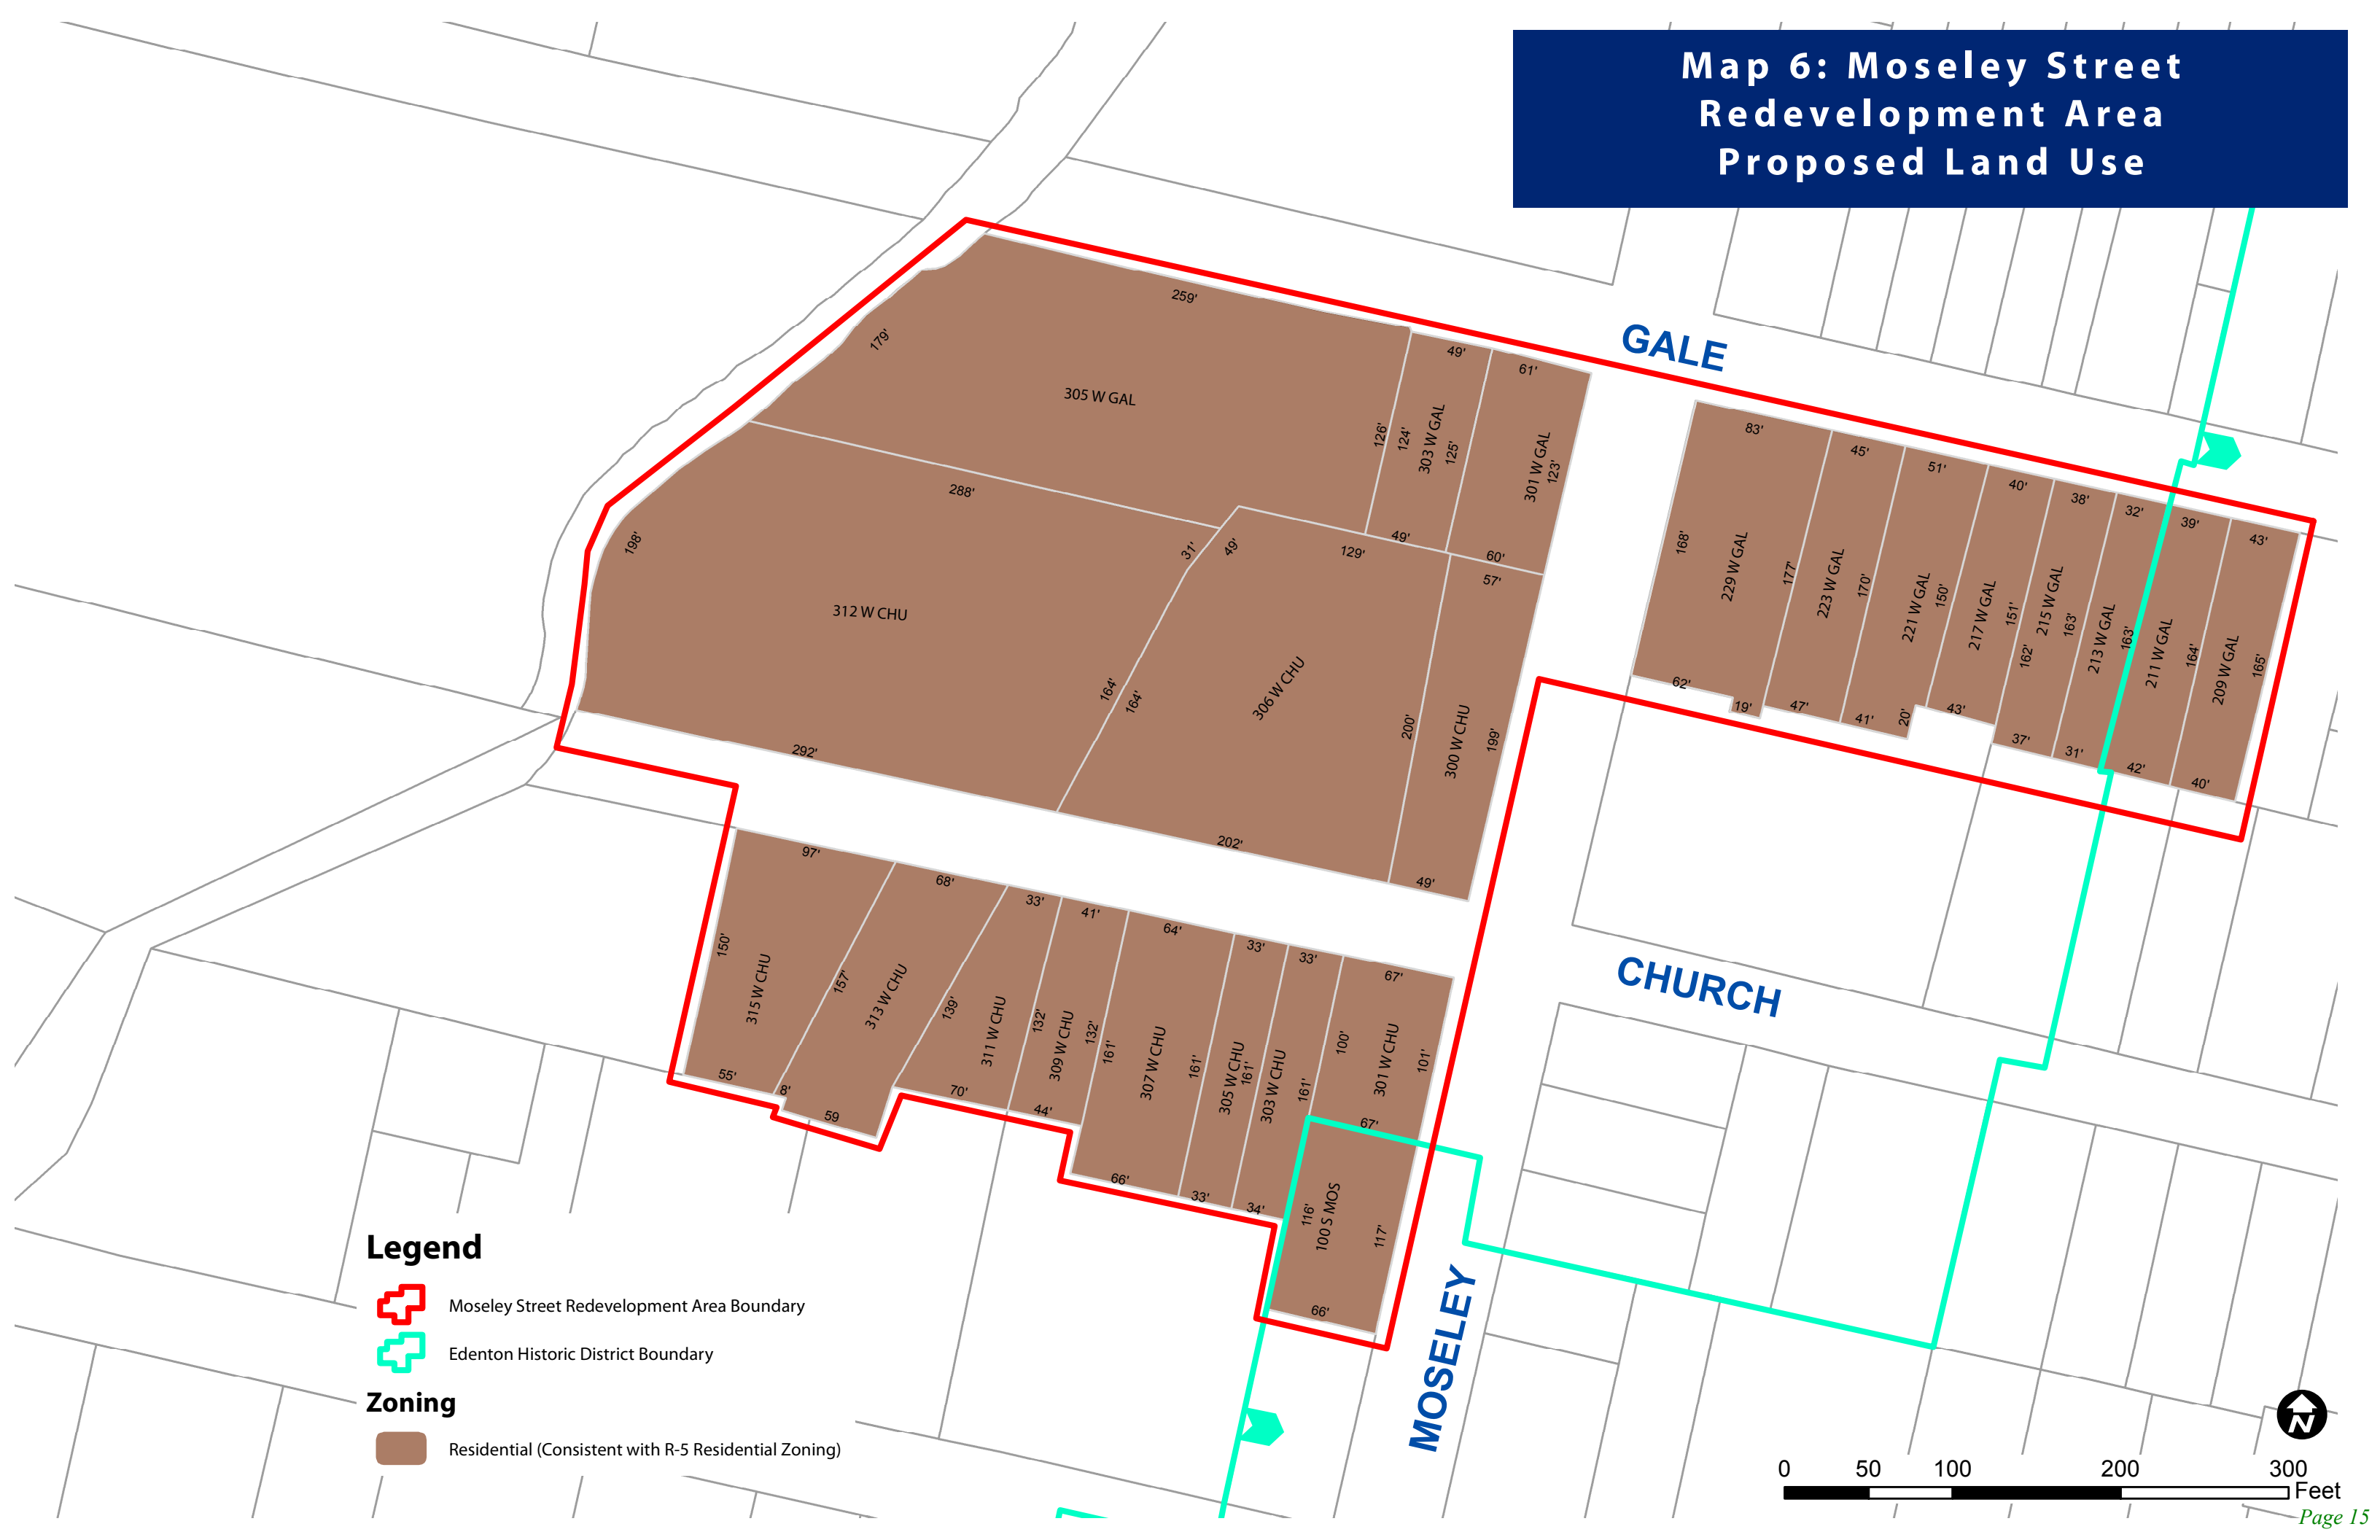

There are no dedicated bicycle facilities or sidewalks in the study area. However, the streets are low-speed and low-volume allowing for easy bicycle traffic flow within the roadway and safe walking conditions along street edges.

Any storm drainage problems are intermittent, minor, and are normally the result of spring and summer convectional storms. Occasional hurricane activity may result in flooding which normally lasts no longer than one to two days or less. Almost one-half (48.96%) of the redevelopment area is located in the Filberts Creek 100-year flood hazard area (see Map 2, page 7). The dead-end extreme western portions of Gale and Church Streets are located in the flood hazard area. A dilapidated structure at 312 West Church Street and a severely deteriorated structure at 300 West Church Street are located in the flood hazard area. The structure (not parcel) at 312 West Church Street will be acquired and demolished, and the structure at 300 West Church Street will be rehabilitated subject to flood proofing not being cost prohibitive. If elevation of the structure is cost prohibitive, the structure will be acquired/demolished, and the parcel will remain vacant for combination with adjacent parcels.

V. PROPOSED REDEVELOPMENT*A. Proposed Land Use*

Map 6 provides the proposed land use plan. As indicated, all uses will be those permitted by the R-5 zoning district. (See Appendix C). No changes in the existing land use pattern are proposed. No changes in the Town of Edenton Unified Development Ordinance (UDO) or zoning map are proposed or required within the redevelopment area, except to address non-conforming parcel situations (see Map 4, page 11). Revisions to Sections 124 and 126 of the UDO will be required to allow possible variances in lot size and setback requirements in the Moseley Street Redevelopment Area in order to accommodate desired new construction on nonconforming lots. The Town of Edenton should rezone the town-owned open space located at the northwest corner of Gale and Moseley Streets from Industrial to R-5 Residential. There are no changes in the existing street layout or street levels proposed or required. The primary objectives of the redevelopment plan are to eliminate substandard housing and residential vacancies in the Moseley Street Redevelopment Area. Accomplishment of these objectives will result in stabilization of the area and reduction in neighborhood crime.

Map 6: Moseley Street
Redevelopment Area
Proposed Land Use

0 50 100 200 300 Feet

B. Prioritization Plan

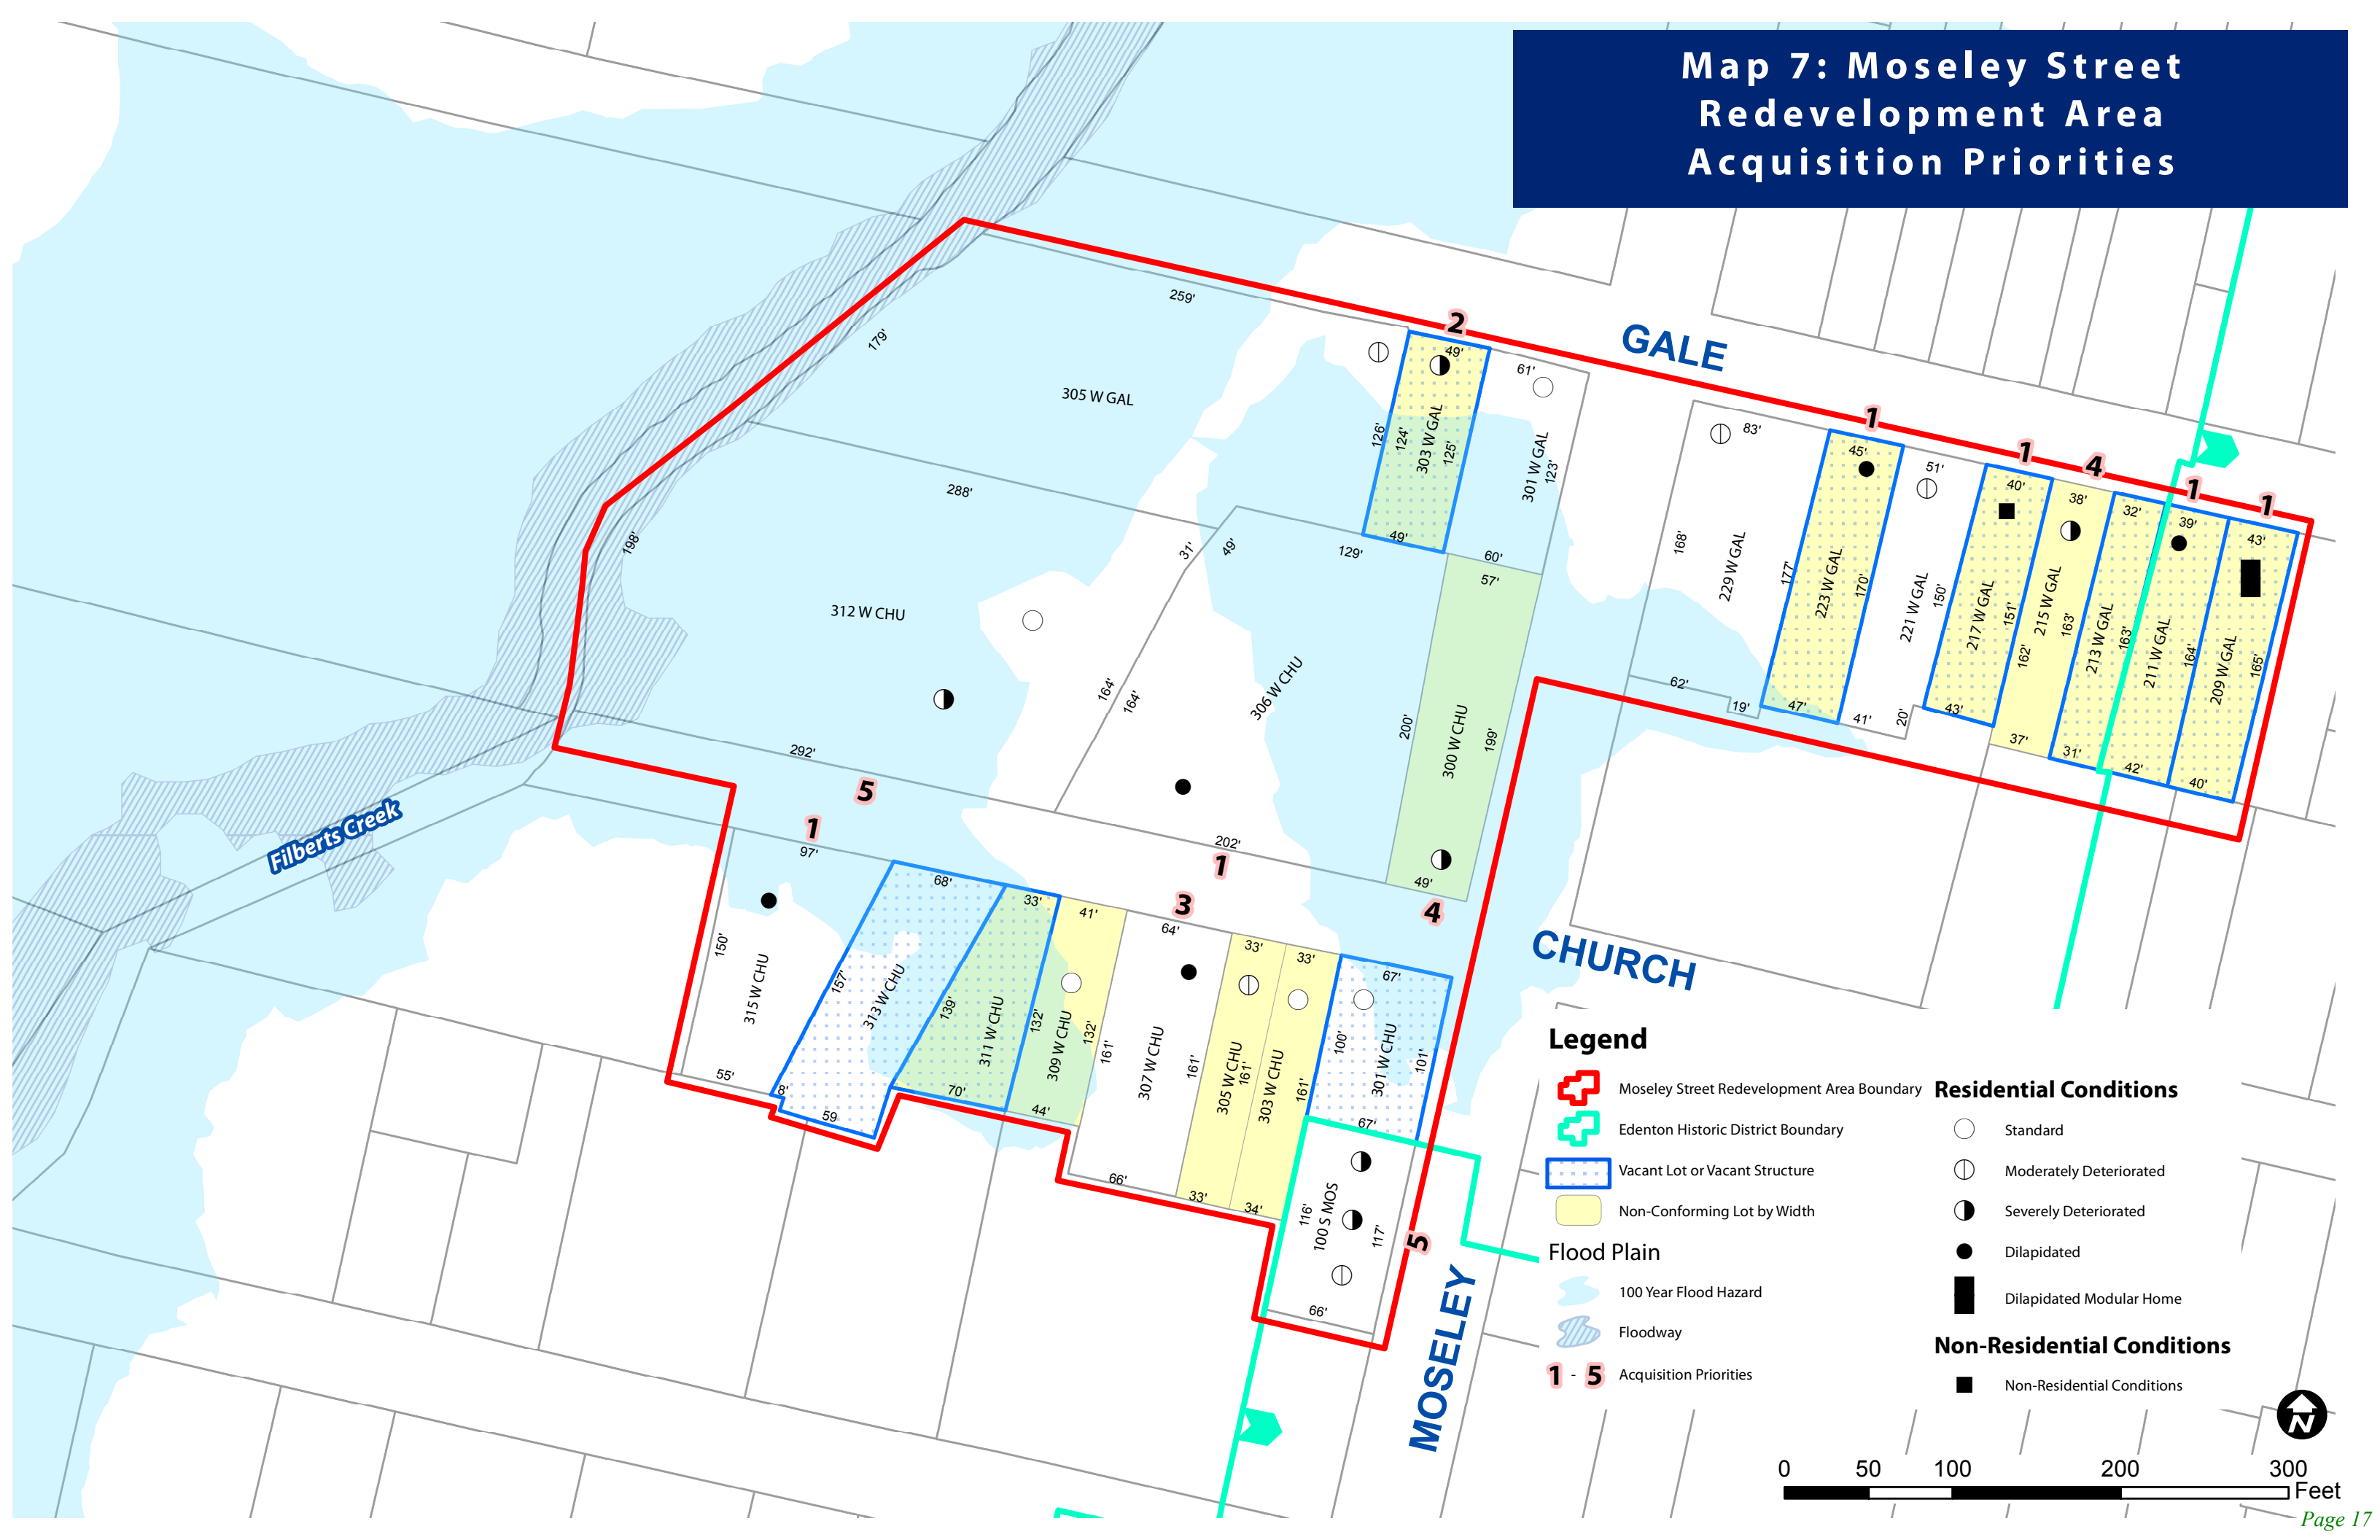

The Town of Edenton Redevelopment Commission and the Town Council prefer that all non-conforming properties within the Moseley Street Redevelopment Area be voluntarily rehabilitated to standard conditions, or, if dilapidated, demolished to allow for new conforming uses. Demolition will be the last resort action to improve the redevelopment area. If detailed on-site inspections indicate that structural conditions permit rehabilitation, the structure may be reclassified to severely deteriorated. However, history has indicated that because of title problems and limited private fiscal resources, voluntary rehabilitation or demolition is not an achievable objective. Therefore, in some instances, forced acquisition, demolition, and disposition by the Redevelopment Commission will be required to improve the livability of the Moseley Street Redevelopment Area. Detailed inspections of all dilapidated properties will be conducted as a part of initiating the acquisition/condemnation process.

The following provides the prioritization plan for property acquisitions. It is emphasized that this Redevelopment Plan strongly favors voluntary rehabilitation, demolition, and new construction when conditions warrant. When voluntary action fails, the following prioritization plan will be implemented. The acquisition priorities are detailed on Map 7. If opportunities arise through voluntary sale/acquisition, the Redevelopment Commission reserves the right to revised the acquisition priorities to expedite plan implementation.

1. Acquire parcels containing vacant dilapidated structures.
2. Acquire parcels containing vacant severely deteriorated structures.
3. Acquire occupied dilapidated structure located on a standard lot.
4. Acquire severely deteriorated occupied structures.
5. Acquire parcels containing severely deteriorated occupied structure(s) co-located on standard parcel with a standard or moderately deteriorated structure when the owner has refused to rehabilitate to standard condition.

Note: Dilapidated and/or severely deteriorated structures which become vacant may change the priorities for acquisition. Replatting of parcels is not planned/anticipated unless voluntarily accomplished by individual property owners.

Map 7: Moseley Street Redevelopment Area Acquisition Priorities

VI. STATEMENT OF COST AND FINANCING

The Moseley Street Redevelopment Plan will be budgeted/financed incrementally on an annual basis. Budget updates/financing will be addressed annually during each fiscal year's budget preparation. However, because this plan is being adopted at the end of fiscal year 2014/2015, the initial financing consideration includes fiscal year 2015/2016 and fiscal year 2016/2017.

The first priority will be the acquisition of properties based on the following acquisition prioritization. Based on 2014 tax values, the prioritization plan provides the estimated value of each property. These values are totaled for each priority grouping.

<u>Priority 1</u>	
209 W. Gale St.	\$ 19,590
211 W. Gale St.	\$ 90,817
217 W. Gale St.	\$ 8,416
223 W. Gale St.	\$ 17,832
306 W. Church St.	\$ 38,934*
315 W. Church St.	<u>\$ 32,930</u>
<i>Subtotal Priority 1</i>	\$208,519
<u>Priority 2</u>	
303 W. Gale St.	<u>\$30,115</u>
<i>Subtotal Priority 2</i>	\$30,115
<u>Priority 3</u>	
307 W. Church St.	<u>\$20,001</u>
<i>Subtotal Priority 4</i>	\$20,001
<u>Priority 4</u>	
215 W. Gale St.	\$38,364
300 W. Church St.	<u>\$57,997</u>
<i>Subtotal Priority 5</i>	\$96,361
<u>Priority 5</u>	
312 W. Church St.	\$25,000
100 S. Moseley St.	<u>\$22,000</u> (2 structures)
<i>Subtotal Priority 6</i>	\$47,000
TOTAL	<u>\$401,996</u>

*NOTE: 306 W. Gale Street was being renovated at the time of plan preparation and may be reclassified to a less severe classification.

The property tax values must be confirmed through fair market property appraisals. (NOTE: A contested property value could require a review appraisal). In addition, each acquisition will require a property survey and legal fees. A protracted condemnation acquisition could greatly inflate legal fees. Therefore, it is recognized that some contested condemnations may be “bypassed” for overall expediency of implementation and cost savings. All base property tax values should be inflated 20% to accommodate increased acquisition costs.

During fiscal years 2015/2016 to 2016/2017, the redevelopment plan objective is to acquire all Priority 1 and Priority 2 properties. The total inflated cost of the Priority 1 acquisitions is estimated at \$250,229, and the total inflated cost of the Priority 2 acquisitions is \$36,132. Thus, the total fiscal year 2015/2016 to fiscal year 2016/2017 acquisition cost would be approximately \$286,361.

The Priority 1 and Priority 2 acquisitions will require the demolition of six (6) dilapidated structures. The cost of demolition is estimated at Fifteen Thousand Dollars (\$15,000.00) per structure (including tipping fees), for a total of \$90,000. Potentially, asbestos inspections and removal could average \$5,000 per structure (\$400 for inspection and \$4,600 for removal), for an additional \$30,000. The total Priority 1 and Priority 2 acquisition/demolition cost is estimated at \$406,361, or an average of \$67,727 per structure. (NOTE: Following acquisition, 303 W. Gale Street may be rehabilitated and not demolished.)

The primary source of financing will be Town of Edenton General Fund revenues. In addition, existing federal, state, and private sector/non-profit funds will be pursued. However, sources of non-local funds have steadily diminished in recent years. The Town of Edenton will annually fund a budget line item dedicated to implementation of the Moseley Street Redevelopment Plan. This budget item will be a “revolving fund” into which funds received from the disposition of acquired properties will be deposited to finance continuing plan implementation. The initial fiscal year 2015/2016 allocation of Town of Edenton General Fund revenues will be \$70,000.00. Additional funds may be allocated by the town as necessary. Subsequent year allocations will be determined by the success of plan implementation and available General Fund revenues.
Note: See code enforcement paragraph for currently budgeted demolition funds.

Appendix D provides a summary of potential funding sources available to the Town of Edenton and individual property owners/tenants. The Town of Edenton staff will continually monitor these sources and, when available, pursue funding assistance.

Code enforcement will be a continuing part of the Redevelopment Plan implementation. All non-conforming properties not prioritized for acquisition will be continuously subjected to enforcement of the Town of Edenton minimum housing code. In fiscal year 2014/2015, the Town budget allowed the expenditure of up to \$70,000.00 total for minimum housing code enforcement. As of March 16, 2015, \$12,665 has been expended. The Town will pursue state/federal/non-profit funding assistance for rehabilitation when available. However, much of

the financial burden of housing rehabilitation will fall on the property owners. *NOTE: The timing of plan implementation will depend on the annual availability of funds for implementation.*

VII. CONTINUING CONTROLS

The following generally identifies the continuing controls which will remain in effect and guide development within the Moseley Street Redevelopment Area (final details remain to be resolved):

- Town of Edenton Unified Development Ordinance;
- Town of Edenton Local Historic District Guidelines (copy available at the Town of Edenton Planning Department). NOTE: The Town of Edenton may consider expansion of the Historic District boundaries;
- Town of Edenton Code of Ordinances, Title XV, Chapter 150, Building Regulation; Construction (copy available at the Town of Edenton Planning Department);
- The Secretary of the Interior's Standards for Rehabilitation (North Carolina State Historic Preservation Office, see Appendix E); and
- Deed restrictions will be imposed on all parcels disposed of for new construction. The preparation of deed restrictions will be coordinated with the Town of Edenton Historic District Commission. At a minimum, the deed restrictions will include the following standards:
 - No flat roofs. Minimum roof pitch shall be 6/12.
 - No fixed windows.
 - Exterior doors will have side or transom glass.
 - No cinder block, stucco, or metal exterior finishes.
 - Two-story or 1-1/2-story structure required if the existing structures on both adjacent, side lots are two-story or 1-1/2-story structures.
 - Porches (not decks) must be covered.
 - Exterior steps must be brick or painted wood.
 - Wood railings must be painted.
 - Brick underpinning required.
 - No construction on slab.
 - No garish colors. No more than three (3) color combinations per structure.
 - A time limit for start of and completion of construction will be specified or property may revert to the Redevelopment Commission.

VIII. FEASIBLE METHOD PROPOSED FOR RELOCATION

When undertaking redevelopment activities, the Town of Edenton will minimize displacement of families and individuals who occupy households in the Moseley Street Redevelopment Area. If only local funds are utilized for the purchase of occupied properties in the redevelopment area, then the Town is not required to follow the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (URA), 49 CFR Part 24, as amended, i.e., no relocation assistance would be required to be paid to the displaced households. The Town will delay forced relocations until state or federal funds can be secured to provide for relocation payments. If, however, state and/or federal assistance becomes available for acquisition of occupied properties and the Town utilizes such funding, then URA regulations must be followed, and if families or individuals are displaced from the acquired properties, relocation assistance must be paid (in addition to purchase price for acquisition) at the following levels:

- 90-day or more owner occupants - replacement housing payment of up to \$31,000, plus a moving expense payment;
- 90-day or more tenants - replacement housing payment of up to \$7,200, plus a moving expense payment.

Replacement housing payments for owner-occupied dwellings are generally based upon the difference in acquisition cost of the displacement dwelling and the most comparable replacement dwelling available on the open market, or the dwelling that the family or individual actually selects as a replacement dwelling, whichever is less. Replacement housing payments for tenant-occupied units are generally based upon the difference in rent and utility costs for the displacement dwelling and the most comparable rental unit available on the open market, or the dwelling that the tenant actually selects as a replacement dwelling, whichever is less – times 42 months. Comparable dwelling units are selected based upon their general similarity to the displacement dwelling in size, location, amenities, and functionality. The income of the displaced household also is factored into the replacement housing payment, based upon the family's/individual's ability-to-pay, and appropriate adjustments can be made for low-income families.

Moving expenses are paid to the displaced families or individuals separate from the replacement housing payments. Either an actual payment for moving expenses – based upon actual documented receipts for the move by a reputable moving company – or a fixed payment for moving expenses can be made. The fixed payment is based upon a schedule published by the NC Department of Transportation, which allocates a payment based upon the number of rooms of furniture in the displaced dwelling. The fixed payment generally averages between \$1,200 (for a 4-room dwelling) and \$1,900 (for an 8-room dwelling).

IX. PLAN INITIATION

Following adoption of the Moseley Street Redevelopment Plan, the following actions should be pursued to support plan implementation:

- Continue enforcement of the Town of Edenton minimum housing code and demolition by neglect ordinance.
- Have Town Attorney initiate condemnation procedures.
- Initiate Notice of Intent to Acquire letters for Priority 1 and 2 properties.
- Have property appraisals prepared to establish fair market value.
- Issue Offers to Purchase.
- Have asbestos inspections conducted and any identified asbestos mitigated.
- Dispose of acquired properties as quickly as possible for redevelopment. Specific requests for proposals should be prepared to solicit the proposal(s) most beneficial to the Town of Edenton.
- Disseminate outreach information to redevelopment area residents on financing assistance and home maintenance/financial management educational programs.
- Conduct quarterly neighborhood implementation meetings in the Moseley Street Redevelopment Area.
- Solicit outreach from local banks to provide financial assistance to area residents for home repairs.
- Pursue all identified government and non-profit funding sources to assist with plan implementation.
- Support objective of transferring at least one parcel per year to the Chowan/Perquimans Habitat for Humanity for the construction of a single-family homeownership dwelling unit.

Appendix A
Resolution Creating the Town of Edenton Redevelopment Commission

**RESOLUTION CREATING THE
TOWN OF EDENTON
REDEVELOPMENT COMMISSION**

WHEREAS, the Town of Edenton finds that blighted areas as defined by NCGS 160A-503 exist within its corporate limits; and

WHEREAS, such areas are economic or social liabilities, inimical and injurious to the public health, safety, morals, and welfare of the residents of the Town, harmful to the social and economic well-being of the entire Town, depreciating values therein, reducing Town tax revenues, and thereby depreciating further the general Town-wide values; and

WHEREAS, the existence of such areas contributes substantially and increasingly to the spread of disease and crime, necessitating excessive and disproportionate expenditures of public funds for the preservation of the public health and safety, for crime prevention, correction, prosecution, punishment and the treatment of juvenile delinquency and for the maintenance of adequate police, fire, and accident protection and other public services and facilities, constitutes an economic and social liability, substantially impairs or arrests the sound growth of Edenton; and

WHEREAS, the foregoing conditions are beyond remedy or control entirely by regulatory processes in the exercise of the police power and cannot be effectively dealt with by private enterprise under existing law without the additional aids herein granted; and

WHEREAS, the acquisition, preparation, sale, sound planning, and redevelopment of such areas in accordance with sound and approved plans for their redevelopment will promote the public health, safety, convenience, and welfare; and

WHEREAS, the redevelopment of such areas is necessary in the interest of the public health, safety, morals, and welfare of the residents of the Town of Edenton; and

WHEREAS, the Town Council's Vision Statement speaks to the Town's intent to improve the quality of all neighborhoods throughout town by focusing on strategies directly related to housing including reducing the number of uninhabitable and dangerous structures abandoned or boarded up through enforcement of the Minimum Housing Code, Unsafe Building Code and Prevention of Demolition by Neglect Ordinance;

WHEREAS, the Town of Edenton will continue to support the Town Planning & Inspections Department efforts to enforce the above mentioned ordinances and continue to appropriate funds necessary to take action to remove dilapidated buildings; and

WHEREAS, the Town of Edenton will continue to support and seek ways to collaborate with the Chowan Perquimans Chapter of Habitat for Humanity to create owner-occupied quality housing; and

WHEREAS, the Town Council will continue to seek guidance and advice from the Town Attorney to ensure that all possible legislative tools are used to enforce housing and quality of life ordinances; and

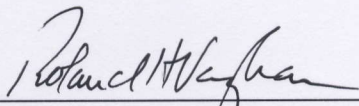

WHEREAS, the Town of Edenton will continue to support the Nuisance Code Enforcement Officer's efforts to enforce the Town's junk vehicle ordinance, noxious weed/high grass ordinance, solid waste & scrap metals ordinance and other nuisance ordinances; and

WHEREAS, the Town of Edenton will continue to support the Edenton Historic Preservation Commission's work to protection dwelling units the local Historic District and promote utilization of historic preservation tax credits to repair and restore structures in the local district and National Register District

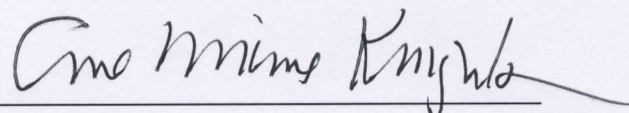

NOW, THEREFORE, be it resolved that the Town Council of the Town of Edenton, hereby:

1. Creates the Town of Edenton Redevelopment Commission.
2. Designates itself to perform the powers, duties, and responsibilities of the Town of Edenton Redevelopment Commission.

Adopted this 13th day of May, 2014.

Roland H. Vaughan, Mayor

Town Clerk

Potential Funding Sources

The following listed programs can be accessed as potential housing funding sources for **local units of government, lender organizations, developers, and/or nonprofit agencies**:

NORTH CAROLINA HOUSING FINANCE AGENCY (NCHFA)

<http://www.nchfa.com/Nonprofits/index.aspx>.

Homeownership Production Programs

- *Community Partners Loan Pool (CPLP)*. The CPLP provides financing that can reduce mortgage payments by 15 percent by offering a 0-interest, deferred second mortgage that is generally used in conjunction with either the NC Housing Finance Agency's Home Advantage Mortgage™ or a USDA Section 502 Loan. **Local units of government as well as nonprofit housing organizations can apply for the funds.** Eligible housing includes: homes built as part of the CPLP member development; existing homes rehabilitated to certain standards; existing homes in a like-new condition; available newly constructed homes meeting certain site and neighborhood criteria; new homes built to either SystemVision™ or other approved green building standard.
- *Self-Help Loan Pool (SHLP)*. **The SHLP assists self-help housing organizations, like local Habitat for Humanity affiliates, to build homes for their home buyers.** The NCHFA provides a mortgage that is combined with the mortgage offered by the nonprofit to fund the borrower through one affordable, interest-free first mortgage. Home buyers use the financing to purchase homes developed by Loan Pool members. Home buyers must have a household income at or below 80 percent the area median and must complete eight hours of home buyer education, and if needed, homeownership counseling.
- *SystemVision™ Energy Guarantee Program*. The SystemVision™ Energy Guarantee Program encourages high standards of energy efficiency in the construction of affordable homes. The program is offered by the NCHFA in partnership with Advanced Energy Corporation, a nonprofit organization in Raleigh. **The Agency will provide a construction subsidy of \$4,000 to nonprofits and local governments for each home they develop through the New Homes Loan Pool or the Self-Help Loan Pool following SystemVision™ guidelines.** The guidelines include specific energy efficiency standards such as smart mechanical ventilation systems that control indoor air quality and humidity levels. Advanced Energy Corporation trains the construction teams in the implementation of these systems.

Financing Programs for Affordable Rental Housing

- *Low-Income Housing Tax Credits*. **In exchange for the financing provided through the tax credit, developers of rental housing agree to keep rents affordable for a period between 15 and 30 years for families and individuals with incomes at or below 60% of the local median income.** NCHFA monitors the properties during the compliance period to ensure that rents and residents' incomes do not exceed program limits and that the properties are well-maintained. The owners are eligible to take a tax credit equal to approximately 9% of the "Qualified Cost" of building or rehabilitating the property (excluding land and certain other expenses). The tax credit is available each year for ten (10) years, as long as the property continues to operate in compliance with program regulations.

- *State Housing Credits.* The State Housing Credit was created by the North Carolina General Assembly in 1999 to be used in combination with federal Housing Credits. The additional financing makes it possible to build affordable apartments in low-income rural areas; lower rents in urban areas; and produce rental housing affordable to persons with disabilities. **Developers who are awarded State Housing Credits may elect to receive the funds as a loan** at zero interest for a percentage of the rental property's rental cost. A development becomes eligible for state credits once NCHFA has approved an application for federal credits. If a development does not receive federal credits, it cannot receive state credits.
- *Rental Production Program (RPP) Loans.* The goal of the RPP is to provide affordable rental housing opportunities for low-income families throughout the state. Through RPP loans, **NCHFA provides long-term financing for rental developers/developments** that serve families earning 60% or less of the area median income. The loans are funded through the NC Housing Trust Fund and the HOME program. A development becomes eligible for the RPP loan only after it has been approved for federal credits. If a development does not receive federal credits, it cannot receive an RPP loan.
- *Multi-Family Tax-Exempt Bond.* Tax-exempt bond financing provides long-term below-market financing for the construction or rehabilitation of affordable rental housing. **Developers seeking tax-exempt bond financing must first identify a local entity, such as a local government or public housing authority, to issue the bonds.** NCHFA reviews applications for bond financing to ensure the properties meet program guidelines. Bond-financed properties are also eligible for a 4% federal tax credit.

USDA RURAL DEVELOPMENT

<http://www.rurdev.usda.gov/>

- *Rural Housing Site Loans - Sections 523 and 524.* This program makes loans to finance building sites which may be developed into residential communities. Section 523 loans made for housing to be built under the Self-Help method of home construction may be made in conjunction with Section 524 Site Loans. **Loans can be made to public or private local non-profit organizations with legal authority to buy, develop, and sell homesites to eligible applicants.**

COMMUNITY DEVELOPMENT CORPORATIONS

<http://www.irs.gov/Charities-&-Non-Profits/>

- *Section 501(c)(3) Organizations.* To be tax-exempt under Section 501(c)(3) of the Internal Revenue Code, an organization must be organized and operated exclusively for exempt purposes and none of its earnings may inure to any private shareholder or individual. The organization must be organized as a trust, a corporation, or an association. **Applications for non-profit agencies seeking tax-exempt status can be accessed through the website listed above.**

Listed below are agencies/organizations who offer auxiliary housing services (i.e., housing repair, weatherization, elderly housing, assistance for those with physical disabilities, etc.). **Applications to these organizations are accepted directly from individuals.**

FEDERAL AND STATE HISTORIC PRESERVATION TAX CREDITS

<http://www.hpo.ncdcr.gov/tchome.htm>

<http://www.nps.gov/tps/tax-incentives.htm>

The Federal Historic Preservation Tax Incentives program encourages private sector investment in the rehabilitation and re-use of historic buildings. The National Park Service and the Internal Revenue Service administer the program in partnership with the State Historic Preservation Office. Tax credits are available at the following levels:

- 20% Tax Credit. For rehabilitation of historic, income-producing buildings determined by the Secretary of the Interior to be "certified historic structures." Must comply with the Secretary's Standards for Rehabilitation.
- 10% Tax Credit. For rehabilitation of non-historic buildings placed in service before 1936. Building must be rehabilitated for non-residential use and requirements have specific criteria regarding external walls and internal structural framework.
- Tax Benefits for Historic Preservation Easements. Voluntary legal agreement, typically in the form of a deed, that permanently protects an historic property. A historic property owner who donates an easement may be eligible for tax benefits.

NOTE: State Historic Preservation Tax Credits Expired at End of 2014. Additional or renewed funding is under consideration by the 2015 NC State Legislature.

Income tax incentives for the rehabilitation of historic structures are important tools for historic preservation and economic development in North Carolina. A federal income tax credit for the rehabilitation of historic structures first appeared in 1976 and today consists of a **20% credit** for the qualifying rehabilitation of **income-producing** historic properties (see above). Since 1998, North Carolina has provided a 20% credit for those taxpayers who receive the federal credit, providing investors with a **combined 40% credit** against eligible project costs. In addition, the state provides a **30% credit** for the rehabilitation of **nonincome-producing** historic properties, including private residences. New State Mill Rehabilitation Tax Credits provide even greater credit amounts for qualifying former industrial sites. Since 1976, over **2,000** completed "certified rehabilitation" projects have been reviewed by the NC State Historic Preservation Office, representing over **one billion dollars** of investment in historic properties. The spinoff from all this activity includes job creation, downtown and neighborhood revitalization, improved community appearance, and greater community pride. Historic preservation is smart growth, and smart investment.

Appendix E

North Carolina

State Historic Preservation OfficeDepartment of Cultural Resources
Office of Archives and History
Division of Historical Resources**The Secretary of the Interior's
Standards for Rehabilitation**

The Secretary of the Interior is responsible for establishing standards for all national preservation programs under Departmental authority and for advising Federal agencies on the preservation of historic properties listed or eligible for listing in the National Register of Historic Places.

The Standards for Rehabilitation, a section of the Secretary's Standards for Historic Preservation Projects, address the most prevalent preservation treatment today: rehabilitation. Rehabilitation is defined as the process of returning a property to a state of utility, through repair or alteration, which makes possible an efficient contemporary use while preserving those portions and features of the property which are significant to its historic, architectural, and cultural values.

**The Secretary of the Interior's
Standards for Rehabilitation**

The Standards that follow were originally published in 1977 and revised in 1990 as part of Department of the Interior regulations (36 CFR Part 67, Historic Preservation Certifications). They pertain to historic buildings of all materials, construction types, sizes, and occupancy and encompass the exterior and the interior of historic buildings. The Standards also encompass related landscape features and the building's site and environment as well as attached, adjacent or related new construction.

The Standards are to be applied to specific rehabilitation projects in a reasonable manner, taking into consideration economic and technical feasibility.

1. A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.
2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.
3. Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.

4. Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.
5. Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a property shall be preserved.
6. Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.
7. Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.
8. Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.
9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.
10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Note: To be eligible for Federal tax incentives, a rehabilitation project must meet all ten Standards. The application of these Standards to rehabilitation projects is to be the same as under the previous version so that a project previously acceptable would continue to be acceptable under these Standards.

Certain treatments, if improperly applied, or certain materials by their physical properties, may cause or accelerate physical deterioration of historic buildings. Inappropriate physical treatments include, but are not limited to: improper repainting techniques; improper exterior masonry cleaning methods; or improper introduction of insulation where damage to historic fabric would result. In almost all situations, use of these materials and treatments will result in denial of certification. In addition, every effort should be made to ensure that the new materials and workmanship are compatible with the materials and workmanship of the historic property.

Guidelines to help property owners, developers, and Federal managers apply the Secretary of the Interior's Standards for Rehabilitation are available from the National Park Service, State Historic Preservation Offices, or from the Government Printing Office. For more information write: National Park Service, Preservation Assistance Division-424, P.O. Box 37127, Washington, D.C. 20013-7127.
